## DETAILED ACTION

### *Reasons for Allowance*

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because prior art fails to teach a cutting means including an operating button mounted on an external surface of the cover and having prominences on a bottom surface thereof, a movable latch having a protrusion loosely fitted between the prominences of the operating button and having a mouth, a lever operated by moving the operating button and connected to an elastic member, wherein the lever includes a hanging part to be inserted in the mouth, hinge pins on which the lever axially rotates, fitting grooves formed on a bottom surface, and pillars protruded at an end opposite to the hanging part, and a cutter provided at a front end of the lever and having a blade to cut the adhesive tape-which has been drawn out by the drawing means, the cutter having holes to which the pillars are fitted and movable up and down by the lever, a pressing part to press and support the adhesive tape and having a guiding piece integrally extended therefrom in the form of a clip to move up and down the cutter fitted in the clip, and wherein the elastic member includes a connecting jaw on which the pressing part hangs, fitting jaws connected with the fitting grooves, and a supporting extension in the form of a thin panel to elastically press and support a top surface of the lever, in combination with other limitations set forth in claim 1, and with the other limitations of the dependent claims 2-3 and 5-6.

Re claim 1, Lee (6,065,519) teaches a case body 11 in the form of a gun having an open top and a receptor to receive an adhesive tape 21 therein; a cover 12 provided

above the case body 11; a connecting means to connect a lower end of the cover 12 and a upper end of the case body 11; a locking means to prevent the cover from being released from the case body; a drawing means 31, 32, including a trigger 32 protruded through an opening 14 of the case body, and a pair of drams 31 & 32, rotated by pulling the trigger with a finger and in contact with a bottom surface of the adhesive rope 21 to draw out the adhesive tape 21 per Figs. 2 and 4; a cutting means 41-44, 46-47, including an operating button 41 mounted on a surface of the cover, a lever 42, 43, operated by moving the operating button and connected to an elastic member 44, and a cutter 47 provided at a front end of the lever and having a blade 47 to cut the adhesive tape 21 which has been drawn out by the drawing means; and a guide means 13, 36-37, provided above the drums to be in contact with a top surface of the adhesive tape and to guide withdrawal of the adhesive tape in the case body per FIGS. 1-6(B).

However, Lee does not teach a cutting means including an operating button mounted on an external surface of the cover and having prominences on a bottom surface thereof, a movable latch having a protrusion loosely fitted between the prominences of the operating button and having a mouth, a lever operated by moving the operating button and connected to an elastic member, wherein the lever includes a hanging part to be inserted in the mouth, hinge pins on which the lever axially rotates, fitting grooves formed on a bottom surface, and pillars protruded at an end opposite to the hanging part, and a cutter provided at a front end of the lever and having a blade to cut the adhesive tape-which has been drawn out by the drawing means, the cutter having holes to which the pillars are fitted and movable up and down by the lever, a

Art Unit: 3724

pressing part to press and support the adhesive tape and having a guiding piece integrally extended therefrom in the form of a clip to move up and down the cutter fitted in the clip, and wherein the elastic member includes a connecting jaw on which the pressing part hangs, fitting jaws connected with the fitting grooves, and a supporting extension in the form of a thin panel to elastically press and support a top surface of the lever.

Neither Lee nor in combination with the other prior arts cited teach the claimed invention set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
